

## CCTV Surveillance Systems

CCTV Surveillance Systems is one of the key security systems in our daily and industrial life. With the power of this solution, we can easily detect our security problem and find out the proper solution. In Bangladesh, BAIITS is a renowned name who has been doing a great job from the last 12 years on this service.

### IP, POE, CCTV Surveillance System

#### The advantage of POE.

- Centralized power supply, one network cable can transmit data and power supply, PoE enables network devices no longer require an extra power supply, greatly reduce the installation cost and time.
- Safe and convenient. Power Sourcing Equipment only provides power supply to PoE-enabled devices.
- POE can be managed through Simple Network Management Protocol (SNMP). This function can offer shut down at night, remote reset etc functions.
